### DETAILED ACTION

1. This office action is in response to applicant's amendment filed on 3/23/2004. Claims 1-2, 5, 8, 10-18, 20, 22-23, 26, 29, 31-29, 41, 43-44, 50, 52-60 and 62 have been amended. Claims 9, 30 and 51 have been cancelled. Claims 1-8, 10-29, 31-50 and 52-63 are pending.

#### ***Double Patenting***

2. Claims 1-8, 11, 13-15, 19-29, 31-32, 34-36, 40-50, 52-54, 56-57 and 61-63 of this application conflict with claims 1, 3-9, 11-12, 14-16, 19-22, 24-30, 32-33, 35-37, 40, 43, 45-51, 53-54, 56-58 and 61-63 of Application No. 09/422,431. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 2134

Claims 1-8, 11, 13-15, 19-29, 31-32, 34-36, 40-50, 52-54, 56-57 and 61-63 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 3-9, 11-12, 14-16, 19-22, 24-30, 32-33, 35-37, 40, 43, 45-51, 53-54, 56-58 and 61-63 of copending Application No. 09/422,431. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Independent claims 1, 22 and 43 of the instant application and the co-pending application claim the same scope of invention even though the wordings are not all identical. The instant application recites "computer-readable program...enables each community member authorized to view that element to use key distribution material associated with the output document when decrypting the encrypted element" and the co-pending application recites "computer-readable program...enables a key recovery agent to decrypt each of said encrypted elements, wherein key distribution material associated with said output document is used as input to said decryption". Since the key recovery agent is an authorized community member (Specification, page 81, lines 9-10) and the scope of the invention is the same. Therefore, they are directed to the same invention.

Dependent claims 10, 12, 16-18, 33, 37-39, 55 and 58-60 are rejected because by their dependency they contain the language of the independent claims.
